ACHIEVEMENT

- Difference maker award at SUMGO INFO TECH PVT. LTD.
- Published research on Digital Lawyer Office in IJARSCT.

CERTIFICATE'S

1. Java training by Spoken Tutorial Project IIT Bombay.
2. Indo-american council for emerging technologies (ICTE).

INTERNSHIP

Company Name:

SUMAGO Info Tech Pvt. Ltd. Nashik. (45 Days)
Intern – Full Stack Web Development

Gained hands-on experience in full-stack development using HTML, CSS, JavaScript, PHP, and SQL. Worked on both frontend and backend components of web projects. Collaborated in a team to deliver quality solutions on time. Also introduced to Python basics. Developed strong problem-solving and development skills ready to apply in real-world projects.

Edunet Foundation | AICTE | Jan 2025-Feb 2025

Completed a project-based internship focused on developing a Crop Recommendation System using machine learning. The system analyzes soil type, pH, weather, and nutrient data to suggest suitable crops, aiming to improve agricultural productivity. Gained practical experience in data preprocessing, model training, and real-world application of AI in agriculture.

Aundip Foundation Training

Core Java

Project's:

1. Title: Digital Lawyer Office (Html, CSS, PHP, SQL, JS)
Duration: 4 Week
A Digital Lawyer Office is a modern platform that streamlines legal operations by managing clients, cases, appointments, and income. It ensures secure access and real-time case status updates for efficient legal workflow.

2. Title: ATM management system (Python, SQL)
Duration: 1 Week
Created an ATM management system in Python and SQL, facilitating secure transactions and user-friendly functionalities with robust error handling and modular design.

3.Title: Yield Prediction using AI and Farming Chatbot (Python, HTML, CSS, JS)
Duration: 4 Week
This project uses AI to predict crop yields based on historical and environmental data, helping farmers to identify the best crop to plant based on their soil. It also includes a farming chatbot that offers tips, weather updates, and pest control advice through an interactive interface.
